Revised December 2019

The EPA governs the storage and disposal of hazardous waste in the United States and mandates the use of the Hazardous Waste Manifest when transporting hazardous waste. Once in transport, the hazardous waste must reach the designated facility within a certain number of days, and the generator must receive a copy of the Hazardous Waste Manifest showing that the waste was received by the designated facility. If the generator does not receive a copy of the manifest signed by the facility, the generator is required to take steps to locate their hazardous waste and may need to submit notification to the USEPA Regional Administrator for the region where the generator is located.

Address for exception report notifications in California:

1 DTSC Report Repository
Generator Information Services Section
P.O. Box 806
Sacramento, CA 95812-0806

Address for exception report notifications in Washington:
